

WATCHGUARD® FIREBOX® SOHO 6TC AND SOHO 6

FIREWALL AND VPN APPLIANCES FOR
SMALL BUSINESSES AND BRANCH OFFICES

Today, complete Internet security goes beyond a firewall. Firebox SOHO 6tc and SOHO 6 are dedicated security hardware appliances that connect your computers, allowing them to share a single broadband connection. Each appliance includes a 10-user license (upgradeable to 25 or 50* users) and supports all leading operating systems.

In addition to dynamic stateful packet filtering, Firebox SOHO 6 appliances provide network address translation (NAT), optional Web content filtering, and the unique LiveSecurity® Service to keep your security updated.

Firebox SOHO 6 models are easy to use. Simply plug them in between your cable, DSL, or ISDN router and your network and conveniently manage everything from your browser inside your trusted network, or remotely with encrypted communication.

FIREBOX SOHO 6TC REMOTE OFFICE VPN END POINT

The Firebox® SOHO 6tc is recommended for:

- Remote offices with up to 50* users
- Businesses looking for high security performance at a good price
- Organizations concerned about ease of use and maintenance who are seeking a plug-and-play security device
- Businesses requiring fast packet filtering and VPN throughput

If you are looking for a simple, secure way to exchange information with your Branch Offices or business partners via the Internet, Virtual Private Networking (VPN) is bundled into Firebox SOHO 6tc.

FIREBOX® SOHO 6
 AFFORDABLE PLUG-AND-PLAY SECURITY
 FOR SMALL BUSINESS

The Firebox® SOHO 6 is recommended for:

- Businesses concerned about ease of use and maintenance, who are seeking a plug-and-play security device
- Small businesses requiring network security and broadband sharing
- Businesses looking for an easily deployed, high performance firewall
- Businesses requiring stateful packet filtering and application level gateways
- Organizations with up to 10 users (upgradeable to 25 or 50*)

PRODUCT FEATURES AND BENEFITS

Features	Benefits
Plug-and-Play, Dedicated Security Hardware	Easily installed and configured using any standard browser.
Internet Security: Create filter rules based on port and protocol for inbound and outbound traffic.	Protects all of your networked computers with dynamic stateful packet filtering firewall technology.
Secure Encrypted Logging	Provides secure, reliable traffic data.
Encrypted Remote Management	Gives you secure and convenient control of your Firebox SOHO 6 model security solution.
Dynamic NAT	Hides internal IP addresses from the external network, giving you an optional level of protection by enabling one of your legal Internet IP addresses to serve as the gateway for all outbound traffic from internal networks.
Meshed Topology VPN	Improves communications and data sharing by connecting multiple sites, and reduces expenses for small businesses. Firebox SOHO 6tc lets you to establish private, encrypted communication tunnels with up to 6 other Firebox SOHO 6 tc devices. (Branch Office VPN functionality optional for Firebox SOHO 6.)

Features	Benefits
Mobile User VPN Licenses	Gives remote users and telecommuters a secure way to access corporate resources. Connect up to 10 mobile employees simultaneously to increase your VPN flexibility. (One license is included with the VPNforce Port Upgrade, increasing the total to 11.)
4-Port 10/100 Switch: Autosenses interface speeds and polarity.	Makes installation easy, and integration with existing equipment seamless.
Broadband Internet Sharing: Share a single cable, DSL, or ISDN high-speed Internet connection.	Saves the costs of multiple connections.
Network 10 Computers (Upgradeable to 25 or 50*)	Permits e-mail and file exchange, and broadband Internet connection, printer, and other peripheral sharing.
LiveSecurity® Service	Receive software updates, security-related editorials, and technical support. An initial, renewable subscription is included.
McAfee® VirusScan® ASaP (1 anti-virus license with initial one-year subscription)	Delivers continuous protection against known viruses, Web attacks, and e-mail intrusions to desktop environments and infrastructures.
VPNforce Port Upgrade**	Restrict Branch Office VPN traffic to the OPT port on your Firebox SOHO 6 appliances, ensuring that telecommuter workstations are as secure as your corporate network. You can also secure a wireless access point through the OPT port to protect wireless devices.
Dual ISP Port Upgrade**	Where ISP connections may be unreliable, the ISP failover feature maximizes your Internet connection uptime by configuring a second, failover ISP connection.

**Firebox SOHO 6tc 50-user appliance and Firebox SOHO 6tc and SOHO 6 50-user license upgrades available in North America and select countries.*

*** NOTE: The VPNforce Port Upgrade and Dual Port Upgrade cannot be used simultaneously.*

PRODUCT OPTIONS AND UPGRADES

VPNFORCE PORT UPGRADE

The VPNforce Port Upgrade gives you:

Branch Office VPN Traffic Separation

- Restricts Branch Office VPN traffic to the Optional (OPT) port, ensuring that telecommuter workstations are as secure as your corporate network.
- Lets you share a broadband connection with family, roommates, or multiple corporate peers and still enforce company security policy on the OPT port.

Wireless Access Point Security

- Plugging a wireless access point into the Optional port increases the security of your mobile wireless computers by creating an IPSec VPN tunnel from the wireless computer to Firebox SOHO 6 models with our Mobile User VPN client, creating a secure IPSec tunnel from your wireless computer to the Firebox SOHO 6 model appliance.
- Prevents wireless “drive by” hacking, securing your Internet connection and your Trusted network.

Firewall between the Trusted interfaces and the Optional interface

- Creates a separate subnet allowing you to block all, or no, traffic.

DUAL ISP PORT UPGRADE

The Dual ISP Port Upgrade gives you:

Two ISP Connections

- ISP failover maximizes network uptime, thereby increasing company and employee productivity; perfect for branch office, retail, and point-of-sale installations.
- Saves money when compared to the cost of using T1s, as less equipment and fewer Telco central office fees are required.
- Very useful where ISP connections may be unreliable.

ABOUT WATCHGUARD

WatchGuard (Nasdaq: WGRD) is a leading provider of dynamic, comprehensive Internet security solutions designed to protect enterprises that use the Internet for e-commerce and secure communications. Thousands of enterprises worldwide use WatchGuard's award-winning products and services. These products include our Firebox firewall and VPN appliances for access control and secure communications, and our ServerLock technology and anti-virus solution for content and application security for servers and desktops. Centralized point-and-click management makes it easy for even the non-security professional to install, configure, and monitor security solutions. Our innovative LiveSecurity service also enables our customers, with minimal effort, to keep their security systems up-to-date in a continuously changing environment.
